J2FAB External Regulator Installation Instructions

- **Green wire to terminal I**
- **Red wire to terminal A**
- **Yellow wire to terminal S**
- **Blue wire to terminal F**
- **Black wire to terminal B-**

Refer to side of external regulator for terminal positioning.

To adjust voltage set-point, use a flathead screwdriver to turn the potentiometer to the desired setting. Do not start with potentiometer maxed out.

Failure to follow instructions may result in damage not covered under warranty.
